# Set System Baud Rate

All standard RS-232 baud rates are supported. The change is stored in memory and naturally survives a power cycle. Default baud rate on new equipment is 115,200 8N1.

> Baud rate is set at startup, so if it's changed using this command, power cycle the DMX Engine to activate the new setting.

```
B9600[cr]

B19200[cr]

B38400[cr]

B57600[cr]

B115200[cr]
```

All baud rates require require 8 data bits, 1 stop bit, no parity.
